SUMMARY

Passionate Software Developer with expertise in React.js, Angular, Node.js. Experienced in building dynamic UIs and integrating frontend with backend services. Strong problem-solving skills with a collaborative and agile approach to development. Enthusiastic learner, staying updated through conferences, freelancing, and hands-on projects.

EXPERIENCE

Software Developer
PraiseArray, Pune | Jan 2023

- Dynamic UI implementation using React.js, Angular, HTML5, CSS3, and JavaScript. for enhanced interactivity.
- Integrated front-to-back components (Node.js, Express.js and MongoDB) for seamless communication.
- Improved team performance through collaborative debugging.
- Embraced agile methodologies for punctual project deliveries and refined user experiences.

PROJECTS

Feedback Management System

- Designed and developed a full-stack feedback platform enabling customers to submit detailed service feedback with image uploads.
- Implemented dynamic form handling and defect reporting features tailored for service industries (e.g., automobile sector).
- Built secure REST APIs with Express and stored data in MongoDB; deployed using AWS services.
- **My Role:** Developed frontend as per Figma designs, built reusable React components, and managed state efficiently.
- **Tech Stack:** React, Node.js, Express.js, MongoDB, AWS, JavaScript, SCSS

Coaching Class Management System

- Created a web app to manage students, courses, attendance, and schedules for coaching institutions.
- Developed responsive UI and intuitive admin dashboard to streamline class administration.
- Built reusable components and ensured seamless data operations with RESTful backend integration.
- My Role: Designed UI based on class workflows, created modular components, and handled state management, developed sign in – sign out api's in node and express.
- **Tech Stack:** React, Node.js, Express.js, MongoDB, JavaScript, HTML, SCSS

WhatsApp Business Dashboard

- Engineered a dashboard integrating Meta's WhatsApp Business API for real-time message management.
- Implemented secure authentication using AWS Cognito and managed user sessions.
- Built backend services in Node.js with Express, used React Query for data fetching, and designed UI with Material UI.

- My Role: Built responsive UI from Figma using React and Material UI, handled API integration and state via React Query, managed end to end flow developed server and api's and aws integration.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, AWS Cognito, WhatsApp Business API, React Query, Material UI

SKILLS

Technical Skills:	React.js, Angular, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Material UI, Node.js, Express.js, Redux, React Testing Library, Jest, Playwright (E2E) testing, npm, MongoDB, AWS (basic services), REST Api, Git, GitHub
Skills:	Team Player, Collaborative, Flexible, Fast Learner, Agile methodologies, Strong debugging.

EDUCATION

- Master of Computer Application (Science) Completed in 2024 | 83.25%

- Bachelor of Computer Application Completed in 2022 | 82.95%

EXTRA CARRICULAR

- Attended Next JS conference virtually to stay updated on latest trends and best practices in Dev.
- Freelanced as Frontend Developer building responsive web apps.

SELF DECLARATION

- I hereby declared that all the details above is true and best of my knowledge.

PLACE: P u n e   **SIGNATURE**
